SPACE SHUTTLE WORD PROBLEMS

Sound and animation motivate students as they strengthen basic math skills

Children embark on an exciting space mission, using their math skills to direct a space shuttle to the moon. The interactive word-problem format challenges students as they must extract pertinent information from each word problem and translate that information into a mathematical equation. Super high-resolution graphics, sound, and animation reward kids as they accomplish each stage of the mission. Children practice addition, subtraction, multiplication, and division skills with new-found pleasure, as the subject matter in this program is both factual and fascinating.

Ages 9-11

- **Kids use an on-screen calculator to input answers.**
- **Immediate feedback is given for all student input.**
- **Student can view step-by-step solutions to each problem.**
- **Kids practice math while learning fun facts about space.**

ADVANCED SOFTWARE BY A TRUSTED NAME IN EDUCATIONAL TECHNOLOGY

Since we produced our first filmstrip in 1975, and first software program in 1980, our materials have been utilized by a growing number of loyal teachers, parents, and students. Our new programs represent the most advanced technology in educational software designed for the latest Apple, IBM, and Tandy computers.

High-resolution graphics and animation plus digitized human voice are used in nearly all of our new programs to reinforce educational concepts. Our talking programs bring the reassuring voice of a human being into the computer learning environment.
